

SECURITY POSTURE ASSESSMENT

Your Business, Your Mission, Secured!

Identifying and Addressing Risk & Resiliency for your technologies, to meet your business objectives.

Security Posture Assessments

Traditional Framework Assessments that scan hundreds of controls can be overwhelming, ineffective and impractical, as you try to get your hands around your environment.

Fidus Cybersecurity Solutions utilizes our cybersecurity experience & expertise to give you a competitive edge, advancing your business and driving growth.

- Fidus applies cybersecurity as a business-enabling function, empowering you to fulfill your goals.
- Fidus cybersecurity experts have the necessary skills to proactively build and manage security solutions. Through our deft approach and understanding of advanced threats, we will deliver confidence to your end-to-end operational cybersecurity.
- Fidus will support your business resiliency with a custom-built strategy, protecting the value and confidence you've earned with your customers.
- Fidus protects our clients from the ever-evolving threats and challenges that come with day-to-day operations and business digital transformation.

High-Level Security Posture Assessment

One executive-level interview (1 hour in duration) and three to five technical interviews (1 hour each in duration) conducted by our experienced Chief Information Security Officers (CISOs) and senior security experts.

Fidus will:

- Assess the executive-level organizational security perspective.
- Conduct technical interviews with your current Security / IT team.

Our Security Posture Assessment via PowerPoint Presentation

Fidus will provide a subjective view of your organization's maturity level across our proprietary security domains required for an effective cyber program.

We will deliver:

- Immediate actions to strengthen your Security Program.
- Longer-term security goals with projects prioritized by urgency.

Ongoing Security Partnership

Fidus will help your organization develop, build, enhance and operate your future security program according to your specific needs.

At Fidus, we have experts in the field to help you on your journey. With decades of experience and a real-world practitioner mindset, Fidus can help, whether you are just getting started or looking to take your program to the next level.
